PROFESSIONAL SUMMARY

Aspiring back-end software developer with strong experience in Java and C++. Proven track record of optimizing applications and validating code through school projects, demonstrating a commitment to quality and efficiency.

SKILLS

- **Skills:** Java; C++; Python; Git and Github; Linux; Relational Database (SQL); Foundational Data Structures and Algorithms; Adaptability to Change; Strategic Issue Analysis; Clear Interpersonal Communications; Curiosity in New Technology; Scripting and Test Automation

PROJECTS

Calira AI

Lead Developer

- Engineered a hand gesture recognition program to link commands to media player like Spotify and YouTube , enhancing user interaction and control.
- Mapped hand gestures to keyboard commands to facilitate playback controls across Windows, macOS, and Linux systems, improving accessibility and functionality.
- Collaborated with a team to incorporate Python , MediaPipe, TensorFlow, and OpenCV, showcasing adaptability in leveraging emerging technologies.

Uniqlo Kiosk System

Assistant Backend Developer

- Developed a CRUD application aimed at providing an interactive kiosk system for Uniqlo Glorietta 5 using a simulated database.
- Utilized Java Swing for the main interface and applied singleton design patterns to ensure efficient data management .
- Conducted testing and debugging to optimize performance and user experience, demonstrating a focus on quality coding practices.

EDUCATION

Specialization in Software Engineering

2023-current?

iAcademy

- [GPA: 3.0, Relevant Courses: Data Structures, Web Dev, Databases, Software Engineering]

PROFESSIONAL DEVELOPMENT

The Git and Github Workshop

June 2024

- An iACADEMY workshop organized by Compile, iACADEMY's School of Computing organization, that teaches and enhances students' skills in Git and Github for version control.
