PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building real-world applications in Python, Java, and C++, with a focus on backend development and mobile platforms (Flutter, Android Studio). Led backend development of a cross-platform AI gesture recognition system using MediaPipe and TensorFlow as well as improved recognition performance by 67%, and contributed to a Java-based kiosk application applying object-oriented design patterns. Passionate about writing efficient, reliable code and solving practical problems through thoughtful system design.

PROJECTS

Calira AI

Lead Backend Developer

- Architected a real-time hand gesture recognition system in Python using MediaPipe, TensorFlow, and OpenCV for analyzing and displaying hand landmarks, mapping 4 hand gestures to keyboard commands across Windows, macOS, and Linux for playback controls.
- Incorporated a frame-command timer and last-gesture tracker to prevent duplicate gesture readings, improving recognition reliability and performance, as well as reducing accidental command triggers.

Uniqlo Kiosk System

Assistant Backend Developer

- Developed a CRUD kiosk application for Uniqlo Glorietta 5 built on a custom in-memory simulated database, enabling product lookup and order simulation.
- Assisted in developing the Java Swing frontend interface, contributing to the implementation of singleton design patterns for consistent shared data management across the application.

SKILLS

- **Skills:** Java; C++; Python; Git and Github; Linux; Relational Database (SQL); Foundational Data Structures and Algorithms; Adaptability to Change; Strategic Issue Analysis; Clear Interpersonal Communications; Curiosity in New Technology; Scripting and Test Automation

EDUCATION

**Bachelor of Science in Computer Science with Specialization
in Software Engineering**

iAcademy

2023-present

PROFESSIONAL DEVELOPMENT

The Git and Github Workshop

June 2024

- An iACADEMY workshop organized by Compile, iACADEMY's School of Computing organization, that teaches and enhances students' skills in Git and Github for version control.
